

CANTAL, MARC AIRON T.

BACHELOR OF SCIENCE IN COMPUTER SCIENCE - MAJOR IN DATA SCIENCE

Victoria, Laguna | +63 976 138 6092 | cantal2227@gmail.com

Portfolio - <https://portfolio-papiairon.onrender.com/> | Github - <https://github.com/PapiAiron>

PROFESSIONAL EXPERIENCE

On-the-Job Training (OJT)

TechFactorsInc. | 134 V. Luna Ext., Sikatuna Village, Quezon City

February 2026 – April 2026

- Developed TALA.Sys, a web-based system for managing equipment, deployments, inspections, inventory, users, and system logs
- Utilized React (Vite), TypeScript, and Firebase to build a responsive and scalable application
- Assisted in robotics and Arduino-related tasks for system integration and automation
- Conducted basic system auditing and testing to ensure reliability and performance
- Collaborated with team members to improve system workflows and functionality

Special Program for Employment of Students (SPES)

2023-2025

Victoria, Laguna Engineering Office

- Provided front-office support by responding to permit inquiries and guiding applicants through application procedures
- Processed and logged official documents related to building permits, zoning applications, and construction compliance materials

PROJECTS

3N8Analytics – Causal Forecasting and Simulation for Beverage Supply Chain Optimization

School Thesis Project

- (React + Vite, JavaScript, Firebase) – Developed a web-based forecasting and simulation system for 3N8 Beverage Distribution Services (Pepsi) that analyzes promotions, holidays, and seasonal trends to improve demand forecasting, inventory management, and supply chain decision-making.

TALA.Sys - TechFactorsInc Internal Operations System

On-the-Job Training Project

- (React + Vite, TypeScript, Firebase) – Developed as an internal web-based system exclusively for TechFactorsInc to manage equipment, deployments, inspections, inventory, users, and system logs. Built using React, TypeScript, Vite, and Firebase to support streamlined operational workflows, data tracking, and system monitoring within the organization.

Botani-Snap AI - Plant Identification System

School Project

- React, Python, Firebase, AI, JavaScript - AI-powered plant identification web application that recognizes plant species through camera capture or image upload, providing detailed botanical information including scientific names, care instructions, and plant characteristics.

Note Nudge - Task Management System

School Project

- (React, Python, Firebase, JavaScript, Tailwind CSS) - A web-based task manager with real-time synchronization, smart notifications, and automatic overdue task archiving built with React and Firebase.

EDUCATION

Bachelor of Science in Computer Science - Major in Data Science

Baccalaureate: Laguna University

2022 - 2026

Secondary Education: Liceo de Victoria

2014 - 2020

Elementary Education: Tomas Daguinsin Elementary School

2008 - 2014

TECHNICAL SKILLS

- AI Automation: Gumloop, Workflow Automation, Process Optimization
- Software Development: Python, C#, .NET, Java
- Web Development: HTML, CSS, JavaScript, React
- Databases: SQL, Firebase, MySQL
- UI/UX Design: Figma

ADDITIONAL INFORMATION

- **Languages:** English, Filipino
- **Technical Interests:** Data Analytics, AI-Driven Automation, Cloud Computing, Software Quality Assurance User Interface & User Experience (UI/UX) Design
